

Graduation Workgroup Minutes, 11.22.05

Agenda

Member Check Data

Data from the member check were shared. Because the sampling was not random, the statistics are merely descriptive, but of those who replied, the themes the GWG distilled were values the community supports.

Conference Debrief

Each person who attended the conference, “Indiana’s Future: Economic Development and the High School Connection” November 17 and 18 shared thoughts or impressions from the conference and what our next steps should be.

Next Steps

Those who attended the conference agreed that the possibilities for schooling in high school and the global world we now find ourselves in need to be communicated widely. The opportunity Bloomington has and the global economy constitute the rationale for why we are investigating high school education. At the next meeting, we will discuss a draft white paper to explain the opportunity we have the urgency of our work.
