

Redesigned!

Spring 2018 SAT Prep

- A shift in the type of vocabulary words students will be expected to know with a greater emphasis on meaning in context
- All new essay section which is now optional
- Only right answers are scored
- The math section will concentrate on three areas: linear equations and systems of algebra, problem solving and data analysis, and advanced math questions that involve the manipulation of complex equations
- Part of the math test will allow calculator use while the other does not
- Test lengths, number of questions, and scoring has changed for the various sections of the exam
