A guide to the MCCSC 1:1 technology initiative, parent access portals, and apps

# Why 1:1?

## LEARNING ANYWHERE, ANYTIME

Providing student access to technology at a 1:1 device ratio transforms instruction and opens worldwide resources for students to learn and create. It is our responsibility to ensure that students are able to navigate and explore the world beyond our doors by providing access to the endless assets and global perspectives available on a subject. The MCCSC 1:1 Technology Initiative ensures that students gain critical experience in project management and solving problems while developing the skills they need to thrive. With the skillset and expertise they develop in our schools, students are prepared with the skills necessary for success through their K-12 education and beyond.

## App Overview

Accompanying the 1:1 Technology Initiative was the introduction of mobile portals for both students and parents. The guide to the right highlights the usage of all three interfaces-Skyward, Canvas, and our mobile app.
